Florentin Smarandache

Pakistanibbles

Agora Publishing House
Sibiu, Romania, 2018

This album displays instant photographies taken in Pakistan, during a two-week scientific visit to the Department of Mathematics of the COMSATS Information Technology Institute in Abbottabad, where I was invited in December 2017 to lecture on neutrosophic topics to professors and PhD students.

The title of this photoalbum combines metaphorically the country name with the verb *nibble*, meaning, according to Cambridge Dictionary, to eat something by taking a lot of small bites; to bite something gently and repeatedly.
